SUMMARY

Solution Architect with 3.5 years of experience in designing & developing enterprise-scale data & AI cloud-native platforms. Proven experience in building distributed ELTs, modern data lakes & AI enabled frameworks for enterprise environments.

PROFESSIONAL EXPERIENCE

Onix Networking Corporation– Princeton, USA **August 2024 - Present**
Data Engineer (Solutions Architect)

- Designed technical proposals, pricing models, and execution roadmaps for projects ranging from $200K-$1.5M+, spanning data transformation, GenAI readiness assessments, and migration impact modeling.
- Optimized data models and workload orchestration DAGs, leveraging query rewriting, slot-aware tuning, and data partitioning - achieving 35%, faster query response and 20% reduction in cloud spend.
- Architected multiple GCP data platforms (BigQuery, Dataflow, Composer, Cloud Storage) supporting 5-50+ TB of multi-source data, with reusable pipeline components aligned to emerging agentic AI workflows.
- Utilized an AI-powered lineage agent to auto-tag metadata across 300+ tables and workflows, enabling dynamic impact analysis, column-level traceability, and governance alignment for downstream migration.
- Designed a multi-agent AI framework to streamline Program Manager workflows for a healthcare client, using Policy & governance guardrails, AI Agents to validate inputs, monitor risk thresholds, and auto-trigger downstream actions.

Onix Networking Corporation- Princeton, USA **May 2023 - May 2024**
Strategic Solutions Development and Data Analyst Intern

- Automated policy and resource management on GCP using Terraform and HCL, achieving 100% automation, saving 20 hours per week.
- Developed a cost estimation app using Python, reducing manual processing by 80% and saving $50K annually.
- Engineered and managed executive dashboards using Google Data Studio, Power BI, and Tableau, resulting in a 10% increase in workflow productivity and enhanced decision-making through actionable insights.
- Leveraged PySpark, SQL, and JavaScript to optimize data storage and retrieval in SQL and Postgres databases, achieving a 40% improvement in query performance.

HSBC Bank– Pune, India **Sep 2020 - Jul 2022**
Data Engineer / Analyst

- Introduced microservices and ETL pipelines using Java, Spring Boot, and Apache Spark, improving deployments by 80%, and utilized Azure Databricks for advanced data processing.
- Directed DevSecOps pipeline with CR Minion, Ansible, and Docker, achieving 100% vulnerability mitigation and implemented snowflake data warehouse solutions for streamlined data storage and analytics.
- Spearheaded CI/CD workflows using Jenkins, Kubernetes, Ansible, and integrated DevOps, leading to a 20% rise in deployments and improved pipeline automation.
- Established a standardized logging framework via Spring Framework to improve data integration, bolstering monitoring functions and security logging by 100%.
- Modernized Hadoop and Kafka for financial big data processing, utilizing Amazon S3 as centralized data storage to enhance data pipeline efficiency by 50%.

EDUCATION

The University of Texas at Dallas, Texas **Aug 2022 - May 2024**
Master of Science - Business Analytics (Specialization in Data Science) GPA 4.00
Pune Institute of Computer Technology, India **Aug 2016 - Mar 2020**
Bachelor of Engineering in Information Technology

SKILLS

Programming Languages & Tools: Python, Pyspark, R, Java, JavaScript, MATLAB, Excel, Google Sheets, Jira, Confluence, Salesforce, ServiceNow, GitLab, Bitbucket, Splunk, ELK Stack.
Big Data & Visualization: Hadoop, Spark, Kafka, Cassandra, HBase, Storm, Tableau, Excel, Power BI, QlikView, Grafana.
Data Storage & Cloud: MySQL, MongoDB, Cassandra, PostgreSQL, SQLite, Amazon RDS, Google Cloud SQL, Azure SQL, AWS, GCP, Microsoft Azure, Microsoft Azure, IBM Cloud, BigQuery, Google Data Studio, Databricks, Amazon S3.
DevOps: Terraform, Ansible, CR Minion, Docker, Kubernetes, Git, Jenkins, Jira, Confluence.
